Resort Heritage & Sustainability

Spice Garden

Our integrated spice garden is more than just landscaping - it's a living, growing part of daily resort life. Threading through different levels of the property, this aromatic garden provides our chefs and bartenders with fresh ingredients, from spicy chilies to fragrant herbs. Watch as mint and basil make their way from garden to plate in our kitchens, or discover how fresh herbs transform into creative cocktail infusions at our bars. This thoughtful garden design not only enhances our culinary offerings but also creates a naturally fragrant atmosphere throughout the resort.

Island Artistry

Every corner of our resort tells a story of Seychellois creativity and craftsmanship. Local artists have created original pieces that capture the soul of island life, from ocean-inspired artwork in *laroul restaurant* to cultural narratives depicted in *marée basse*. Our commitment to local artisanship extends to the carefully selected furniture, where locally sourced wood has been transformed into bespoke pieces by island craftspeople. In the bedrooms, handmade macramé details add touches of artisanal charm, creating spaces that authentically reflect our island heritage.

Environmental Commitment

Our approach to sustainability weaves through every aspect of resort operations. Solar panels harness the tropical sun's energy, while our fitness center embraces natural ventilation to reduce energy consumption. We thoughtfully manage our resources through mindful linen and towel programs, and actively work to minimize our environmental impact. These initiatives reflect our dedication to preserving the natural beauty of our island home for future generations.
